START DATE*

May 18th

FINAL DATE*

May 18th

IMAGE

The Event will take place in the future facilities of the Botanical Garden of the University Campus of Universidade Agostinho Neto, with a focus on the Plantation of 10 Seedlings of *Adansonia digitata* L, 10 *Sterculia quinqueloba* Garcke, 8 *Euphorbia conspicua* NEBR e 8 *Moringa oleifera* Lam

The choice of these plants is based on their Botanical, Ecological, cultural and medicinal value. They are species of easy cultivation, do not require special treatment, are native to the place and are fast growing. They provide shade, food fruit and form part of the ornamentation of the area reserved for the future facilities of the Botanical Garden of the University Campus.
